

## Wealth of Knowledge

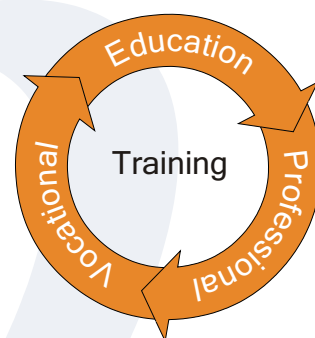

Knowledge is critical to the growth of an individual as well as an organization. Most organizations have a wealth of knowledge. They need to channelize this knowledge into effective knowledge platforms to enhance performance and growth.

At N-syst, we analyze your knowledge needs, write/restructure the content and deliver it in a manner that the organization benefits.

## Training Needs

Knowledge and training is an integral part of an individuals evolution. Right from educational, professional to vocational training, knowledge is important.

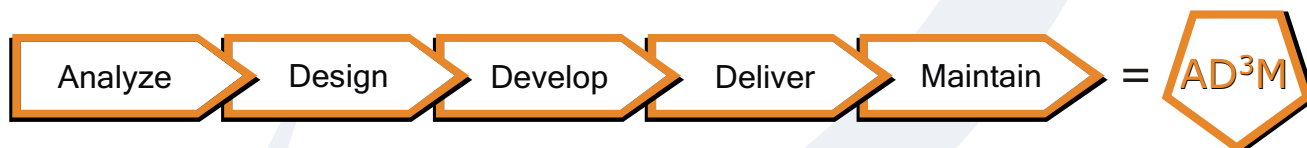

We work with educational institutes, technical institutes, publishers, technology solution providers, and organizations to effectively deliver end-to-end content solutions.

## Process

Every organization follows processes. The same is true to content solutions.

At N-syst, we understand the need to better the process and maintain productivity metrics and dashboards.

## Services

- ◆ Instructor Led Training
- ◆ E-Learning
- ◆ Technical Writing
- ◆ Content Digitization

## Product

- ◆ Flash Accessible E-Learning Architecture

## Values

We work on the AD<sup>3</sup>M methodology to deliver end to end content solutions to our clients. Our team works as an extension to your organization.

We see value in building relationships that help us grow together!

We explore newer ideas and innovative teaching methodologies to make learning interesting.

## Vision

“Enlightening people by creating and spreading a wealth of knowledge”

N

## Instructor-Led Training

One of the foremost modes of training has been instructor led training or classroom training. Even though this mode of training is delivered by a skilled trainer, it is important to bring standardization into the content and delivery. This enables companies to replicate or re-utilize this knowledge in different ways such as conducting more courses or teaching the course at multiple locations.

At N-syst, we work with planning the course content to the strategy of the delivery of the training. We work on facilitators guides, worksheets, students and lab deliverables, as well as assessment questions.

N

## Technical Writing

On the one hand technology is getting simpler, on the other hand the features are becoming more complex. Users find it difficult to use the products without adequate support. As an organization selling products, it is important to provide the relevant documentation to the end user. The user needs to have simple and easily reference-able material that would help them know the product better.

At N-syst, we create technical documentation such as online help files, user guide, and Knowledge base articles. We also provide documentation upgradation and maintenance services.

N

## Content Digitization

Content is spread across various formats ranging from hard copy to different electronic formats. Repurposing the content and creating a usable and referenceable format would be of value to organizations.

At N-syst, we can convert the content into various formats such as Indesign, PageMaker, HTML/XHTML, XML, NIMAS, ebook, e-journal, and PDF.

N

## E-learning Development

Emerging technologies have given a new dimension to training. Today, learners would like to learn wherever and whenever and at their own pace.

Now e-learning can help organizations deliver training to the customers easily.

At N-syst, we plan the user interaction, create the content, design and develop the learning environment. Our teams visualize the graphics, animation, and simulations.

In addition, N-syst converts existing legacy based trainings such as ILTs, videos, and books to web based trainings. We work with accessibility and section 508 compliance alongwith SCORM and AICC compliance.

N

## Accessible Flash Framework

As an equal opportunity employer or an organization that provides equal opportunity in education, it is important to also consider the needs of the persons with disabilities.

At N-syst, we have developed the **first accessible e-learning architecture**. Invest in this product and ensure that the needs of your organization are met.

### Features:

- ◆ Captioning
- ◆ Audio Transcript
- ◆ High Contrast
- ◆ Large Icons Option
- ◆ Keyboard Navigation
- ◆ Shortcut Keys
- ◆ Screen Reader Support and much more...
